

What if you could put mundane processes on autopilot?

As organisations continue to change with the times, managing daily operations creates new challenges that intensify old pain points: managing hybrid workforces; manual, labour-intensive processes that are costly and error-prone; strained IT resources and overstretched budgets; new technology that doesn't quite work with existing systems; and lack of ROI clarity makes it nearly impossible for organisations to see what's next, let alone plan for it.

Productivity That's Automatic

Time-consuming workflows that rely solely on paper and people demand change. Businesses need processes that support growth, not prevent it. The answer? Robotic Process Automation (RPA) — frees you up to focus on running your business while tasks that hold you back take care of themselves.

Stay ahead and agile by automating manual workflows. Xerox® Robotic Process Automation Service lets you get more done in less time and with fewer resources. Customising the solution provides a clear picture of your time and cost savings. We'll work with you to identify exactly what processes would benefit the most from automation, so you can:

Hit the ground running with pre-loaded, ready to use processes from our extensive bot catalogue

Boost efficiency with bot workforce that provides comprehensive automation across key business processes.

Improve cost visibility with simplified pricing that includes the bot, configuration, deployment and more.

See exactly how much time and money your bot workforce is saving you with the ROI calculator

Get up to speed with cloud or on-premise deployment. Most implementations take only a few weeks.

Getting work done couldn't be easier.

It doesn't matter what industry you're in or if your organisation is small, large, or somewhere in between. As a strategic partner, we're here to help you improve the way you work by automating manual processes so you can do more with less human intervention and lower costs. Xerox® Robotic Process Automation Service helps you stay flexible in the face of change, allowing you to save, plan, and pivot as needed.

We help you evaluate your current processes, no matter how big or small they are.

We virtually automate and run your processes using bots

We work together to select and automate workflows based on business value and expected ROI.

We help you create a better employee experience by freeing up your staff to focus on higher value work while bots take on routine jobs.

Work that gets itself done with a made-to-fit solution

Our solutions are customised to address your unique challenges — your needs stay front and centre, always. Being a single provider means we're a one-stop-bot-shop — our automation team assesses, builds, deploys, and supports the RPA capabilities in your process based on what works best for your business. We do the heavy lifting virtually, so you can focus on what matters most. And if we don't have a bot for a process you'd like to automate, we'll work with you to build one.

Bot Catalogue

Extensive bot gallery with multiple ready-to-use processes.

Each bot has clear responsibilities / task list. Configurable forms, inputs, outputs and steps to fit your needs.

ROI Calculator

Input costs and hours spent on tasks and check ROI with the bot.

Input your info and see the time/cost savings of bot workforce. Show a breakeven timeline before we decide what's best for you.

Optimal ROI for your business

BOT WORKFORCE

Multifunction
Process
Automation

Simplified Pricing

Annual licence fee per bot tailored to your business needs.

Price includes bot, bot configuration, interfaces to systems, deployment, hosting, training (up to 30 hours) and 100 hours of free support per year.

Fast Deployment

Our offering covers bot implementation from the catalogue.

With 5-8 weeks for most implementations and hosted on Xerox cloud or on-premise.
