Xerox DocuShare Flex Overview

DocuShare Flex is a cloud-based content management solution that addresses the growing needs of businesses to manage documents, content, and processes efficiently. It is designed to transform workspaces and enhance workflows through easy document capture, management, and sharing.

Key Pain Points for Companies

1. Document Overload:
Companies face the challenge of managing an increasing volume of documents and data.

2. Process Inefficiencies:
Traditional methods of handling documents and content can lead to inefficient and time-consuming processes.

3. Collaboration Concerns:
Difficulty fostering effective teamwork and collaboration, especially in handling shared documents and content.

4. Security Concerns:
Ensuring business documents and data security and confidentiality.

5. Scalability Issues:
Adapting to the changing scale of operations and user requirements.

How DocuShare Flex Addresses These Pain Points

Simplified Capture:
DocuShare Flex simplifies document capture using various devices, including mobile devices and scanners. It offers features like automatic OCR, barcoded separator sheets, and multi-file drag-and-drop for efficient digitisation and organisation of paperwork.

Effective Management:
Customisable document types, workflow steps, and automation of standard business processes help manage documents and employee workloads efficiently. This includes applications in contract management and HR onboarding.

Streamlined Automation:
Workflow tools in DocuShare Flex enable the creation of tailored automation solutions, aiding in going paperless and automating approval processes.

Enhanced Automation:
It facilitates teamwork with features like image annotation, multiple e-mail content-sharing options, and team folders for effective collaboration.

Digital Transformation:
DocuShare Flex assists in digitising contract processes, from collaboration to digital signing, ensuring compliance and supporting quick retrieval and renewal processes.

Accessibility:
The solution is designed to adapt quickly to the unique processes of small and medium-sized businesses (SMBs) or departments, with applications in processes like Accounts Payable.

Ease of Use:
With a simple setup, intuitive interface, and SaaS-based cloud delivery, DocuShare Flex is user-friendly and requires minimal training or IT support.

Mobile Accessibility:
The mobile app allows users to access, view, and share documents and perform tasks like document approvals on the go.

Robust Security:
Following industry best practices, DocuShare Flex offers encrypted user authentication, data archiving, and comprehensive rights and permissions controls.

Scalability:
The solution grows with your business, accommodating changes in user numbers, storage space, and process requirements.
